- PM only – \$150
- Whole day – \$250

Morning Tea and Afternoon Tea will be provided.

Lunch available for purchase or delegates may bring their own.

Location

Technology Park Function Centre
2 Brodie-Hall Dr, Bentley

Workshop 1: 9.30AM-12.30PM

Responding to pornography through a public health lens

Increased numbers of educators, clinicians, health professionals and parents are witnessing concerning sexual behaviour trends amongst children and young people. A rise in sexting, non-consensual online and offline activities, and normalisation of pornography can trigger sexual harms amongst children and young people, leaving them more vulnerable to online and offline exploitation. It is clear we need a broader understanding of how to address these issues in our schools and communities. Globally, an increasing number of governments are discussing the impacts of pornography through a public health lens.

Workshop Outcomes

- Understand Critical Porn Analysis as an educational response to the researched harms of pornography as a public health crisis
- Gain knowledge to create community awareness and initiate proactive change
- Be directed to resources that prevent access and increase conversations about pornography and its harms
- Gain strategies to engage and equip parents

Workshop 2: 1.30PM-4.30PM

Resilience to Porn - the missing link in Sexuality Education & Cyber Safety

Educators and school administrators are constantly dealing with the fall-out stemming from children and young people accessing online pornography. These behaviours include increased online & face-to-face sexual harassment, sexting, body-image issues and classroom pornography use. This workshop will utilise international research and sound pedagogy to equip school leaders with concrete tools to implement education and frameworks aimed at preventing sexual harm and resisting exploitation from a hypersexualized culture.

Workshop Outcomes

- Investigate why many Relationships and Sexuality Education (RSE) approaches are inadequate to equip young people
- Explore school protocols for implementing processes and practices that prevent and respond to pornography and sexual harms
- Discover approaches to implement safeguarding responses to prevent sexual harms, and build young people's resilience to exploitation and hypersexualized culture
- Provide educators access to an alternative sexuality education framework and classroom resources (1 x lesson plan for Primary Schools + 1 x lesson plan for High Schools)

About Liz

Liz Walker is an accredited sexuality educator, speaker, and author. In addition to her role as Managing Director of Youth Wellbeing Project, Liz is Chair of eChildhood, a registered health promotion charity in Australia dedicated to mobilising responses that reduce the harmful effects of pornography on children and young people. She is also consultant Director of Health Education at Culture Reframed.

Well-connected and sought after internationally, Liz regularly provides education and consultancy to government, non-profit, and professional organisations.
